SUMMARY

Backend Java developer with over 15 years of experience in REST APIs, microservices and systems integration, working on availability and resilience. Experience in application modernization, from J2EE legacy to cloud services. Last 8 years in Java with Spring Boot on AWS, with messaging, observability and delivery automation.

TECHNICAL SKILLS

Languages: Java (8, 11, 17, 21), Go, Node.js, Python

Frameworks: Spring Boot, Spring Data, NestJS, Angular, React

Messaging: Kafka, RabbitMQ, ActiveMQ

Data: DynamoDB, Oracle, MySQL, SQL Server, Redis, Elasticsearch

Cloud: AWS (ECS/Fargate, Lambda, Step Functions, S3, EC2, CloudWatch), Docker, Terraform

Observability: Datadog, Grafana, CloudWatch, Splunk

CI/CD and quality: GitHub Actions, GitLab CI, Jenkins, JUnit, Mockito, JaCoCo, pytest, Sonar

Version control: Git (GitHub, GitLab, Bitbucket), SVN

Methodologies: Scrum

PROFESSIONAL EXPERIENCE

Zup · Senior Backend Developer · Jul. 2023 – present

- Develop three conversational AI agents that perform Pix payments, with Go/Java backend and Python agents.
- Built and maintained REST APIs exposing customer registration data consolidated from external credit bureaus for internal consumption, in Java 11/17/21 microservices with Spring Boot on ECS Fargate and DynamoDB.
- Evolved these API contracts to expose new data as it became available in the database, alongside the data team responsible for ingestion.
- Maintained the services in a CI/CD pipeline on GitHub Actions with GitFlow, with tests in JUnit, Mockito and pytest, coverage in JaCoCo and static analysis in Sonar.

Globo · Backend Developer · Jul. 2021 – Jul. 2023

- Built and maintained applications for scheduling and distributing commercials in the broadcaster's programming grid, in the Globo Ads squad.
- Implemented new features and adjustments to existing systems, in Java 11 with Spring Boot, NestJS, ReactJS, RabbitMQ, Redis, MySQL, SQL Server and Oracle, with delivery via GitLab CI/CD on Tsuru.

Seguros Sura · Fullstack Developer · Jul. 2017 – Jul. 2021

- Built and maintained Java 8 and Node.js microservices for the Auto and Transport insurance products.
- Worked with Spring Boot, Spring Data, JPA, GraphQL, JWT, Docker, Jenkins, Elasticsearch, SonarQube, ActiveMQ, IIB and AWS (Lambda, Step Functions, S3, EC2), plus Angular and AngularJS on the frontend, with Bitbucket and SVN for version control.
- Maintained legacy applications in JSF, Struts, EJB 3 and Java 6/7.

Capgemini (Client: Bradesco) · Systems Analyst · Nov. 2015 – Mar. 2017

- Built and maintained Java applications on AWB, Bradesco's in-house JSF framework, integrating with Mainframe and COBOL through the PDC framework.

Earlier experience

Procenge (Client: Embasa) · Systems Engineer · Oct. 2013 – Nov. 2015
Migration of a commercial system from COBOL/EGL to J2EE, on Embasa's in-house web framework based on JSF 2. PrimeFaces, EJB 3, JPA/Hibernate and DB2 on JBoss.

Meta IT (Client: Vivo) · Java Developer Analyst · Nov. 2009 – Sep. 2013
Vivo's legal department system in J2EE, gathering requirements directly with the legal team. JSTL, JSF 1.2, EJB 2, PL/SQL, Oracle, JBoss and WebLogic.

Polo-It (Client: Insinuante) · Java Developer · Aug. 2007 – Nov. 2009
E-commerce in Java, J2EE, EJB 3, JDBC, PL/SQL and JSF, plus internal time-tracking and accounting systems in Struts, JDBC and PL/SQL.

220i Tecnologia · Python / Java Developer · Aug. 2006 – Jun. 2007
Institutional websites in Python (Zope, Plone) and maintenance of an ASP application.

Contax S.A. · ASP / Java Developer · Nov. 2002 – Oct. 2005
Call center intranet for the phone maintenance department, in ASP, JSP and Access.

EDUCATION

Bachelor's degree in Information Systems — UniRuy Wyden (formerly Faculdade Ruy Barbosa), 2014

LANGUAGES

Portuguese — native English — advanced reading, intermediate writing, basic conversation
