SUMMARY

Backend developer with a career built on Java, from J2EE to the AWS cloud, now working with Go and AI agents day to day. I have worked in insurance, media and banking, building REST APIs and microservices and modernizing legacy systems, with messaging, observability and CI/CD.

TECHNICAL SKILLS

Languages and frameworks: Java (8, 11, 17, 21), Go, Node.js, Python, Spring Boot, Spring Data, NestJS, Angular, React

Messaging and data: Kafka, RabbitMQ, ActiveMQ, DynamoDB, Oracle, MySQL, SQL Server, Redis, Elasticsearch

Cloud and observability: AWS (ECS/Fargate, Lambda, Step Functions, S3, EC2, CloudWatch), Docker, Terraform, Datadog, Grafana, Splunk

CI/CD and quality: GitHub Actions, GitLab CI, Jenkins, JUnit, Mockito, JaCoCo, pytest, Sonar

Version control and methods: Git (GitHub, GitLab, Bitbucket), SVN, Scrum

PROFESSIONAL EXPERIENCE

Zup · Senior Backend Developer · Jul. 2023 – present

Since Jan. 2026

- Develop the backend and conversational AI agents that perform Pix payments, in Java, Go and Python, enabling AI-powered service to expand to nearly 10x more customers.

Jul. 2023 – Dec. 2025

- Built a machine learning-based customer registration validation API, from pilot to production rollout.
- Modernized the contracts of the customer registration REST APIs, in Java 11/17/21 and Spring Boot on AWS (ECS and DynamoDB).

Stack: Java 11/17/21, Go, Python, Spring Boot, Kafka, AWS (ECS Fargate, DynamoDB), GitHub Actions, JUnit, Mockito, pytest, JaCoCo, Sonar.

Globo · Senior Backend Developer · Jul. 2021 – Jul. 2023

- Evolved the microservices that match scheduled TV commercials against what actually aired, proving ad delivery, adding new validation and reconciliation rules and propagating results to regional broadcasts.
- Built end-to-end features, from Java and NestJS backends to React screens, for manual verification and failure handling by the operations team.
- Strengthened the reliability of integrations with legacy systems, handling concurrency, failure reprocessing and data resynchronization.

Stack: Java 11, Spring Boot, NestJS, React, RabbitMQ, Redis, MySQL, SQL Server, Oracle, GitLab CI/CD, Tsuru.

Seguros Sura · Senior Fullstack Developer · Jul. 2017 – Jul. 2021

- Built the new version of the cargo transport insurance quoting and proposal system, in Java 8 with Spring Boot and AngularJS on AWS, modernizing the Java 6/JSF/EJB legacy, with modules for broker commercial agreements, scheduling and policyholder screening.
- Supported the modernization of policy delivery to policyholders in a Java 6/JSF/EJB/WebSphere legacy system, helping replace postal mail with email.
- Extended the Java backend and Node.js integrations behind a high-net-worth auto insurance product's serverless flow, connecting it to a credit bureau and to an external claims database, and integrated the product into the broker portal.
- Evolved claims payment tracking, covering bank return and event history, and extended it to life insurance.

Stack: Java 8, Node.js, Spring Boot, Spring Data, JPA, GraphQL, JWT, Angular, AngularJS, ActiveMQ, IIB, Elasticsearch, AWS (Lambda, Step Functions, S3, EC2), Docker, Jenkins, SonarQube, Bitbucket, SVN.

Earlier experience

Capgemini (Client: Bradesco) · Systems Analyst · Nov. 2015 – Mar. 2017
Built Java applications for Bradesco's channels, connecting the JSF front end to core Mainframe and COBOL systems.

Procenge (Client: Embasa) · Systems Engineer · Oct. 2013 – Nov. 2015
Migrated, as part of the team, the commercial system of Embasa, Bahia's water and sanitation utility, from COBOL/EGL to Java web, with JSF 2, PrimeFaces, EJB 3 and JPA/Hibernate on JBoss and DB2.

Meta IT (Client: Vivo) · Mid-level Java Developer · Nov. 2009 – Sep. 2013
Evolved Vivo's legal department system in J2EE, with JSF 1.2, EJB 2 and Oracle on WebLogic and JBoss, helping gather requirements directly with the legal team.

Polo-It (Client: Insinuante) · Junior Java Developer · Aug. 2007 – Nov. 2009
Built features for Insinuante's e-commerce platform in J2EE, with EJB 3, JSF and Oracle/PL/SQL, helping deliver the platform pilot. Contributed to maintaining the internal timekeeping and accounting systems in Struts 1 and PL/SQL on JBoss.

220i Tecnologia · Software Development Intern · Aug. 2006 – Jun. 2007
Helped build corporate websites in Python on the Zope and Plone CMSs, and contributed to maintaining ASP applications.

Contax S.A. · Programmer · Nov. 2002 – Oct. 2005
Maintained a dynamic internal site in ASP and Microsoft Access that guided call center agents in triaging phone maintenance tickets for Oi, a Brazilian telecom carrier.

EDUCATION

Bachelor's degree in Information Systems — UniRuy Wyden (formerly Faculdade Ruy Barbosa), 2014

LANGUAGES

Portuguese — native English — advanced reading, intermediate writing, basic conversation
